➢**Technical Languages:** Python, Java, JavaScript, HTML/CSS, SQL, R, Git, DevOps
➢**Data Analysis and Visualization:** Excel/VBA, Power BI, Power Automate, Tableau
➢**Business Processes:** Process Mapping, Gap Analysis, Business Documentation, UML Diagramming, Agile & Waterfall Methodologies, Data Management & Governance, Microsoft Visio, Jira, Confluence

Work Experience

Toronto Metropolitan University Toronto, ON
Bootcamp Co-Facilitator September 2026 - December 2026
➢Co-facilitated hands-on technical bootcamps in Excel, Power BI, Tableau, Python, and SQL, guiding TRSM students through practical, business focused applications of each tool to strengthen their data analysis and problem-solving skills.
➢Collaborated with a team of facilitators to plan and refine bootcamp content, helping bridge classroom learning with real world technical demands.

HotTakes Toronto, ON
Business Development Associate May 2026 - August 2026
➢ Built structured Excel spreadsheets to document and monitor user data, using VBA scripts to automate data extraction, transformation, and reporting, preparing insightful reports to visualize KPIs for the internal team utilizing Power BI.
➢ Participated in team Scrum meetings, contributing to discussions on progress, identifying impediments, and collaboratively devising solutions to improve workflow.
➢ Executed peer-to-peer marketing and user-outreach initiatives across social and in-person channels, increasing customer engagement and platform adoption.

Mount Pleasant Group Toronto, ON
Funeral Directors Assistant June 2025 - Present
➢Utilized Excel to document and organize funeral preplanning information, including client details, service preferences, and arrangement records, to ensure accurate record keeping for internal team use.
➢Handled administrative and customer service tasks by answering family inquiries, scheduling appointments and using the company's P-drive to assist customers in locating graves through the cemetery database.

Projects

➢ NBA Breakout Season Analysis
Developed a Python analytics tool that fetches multi-season player statistics from a REST API and analyzes the data using Pandas and NumPy to identify and rank players having breakout seasons using a scoring model.
➢ Canadian Banking Analysis
A Python data analysis project comparing Canada's Big Five banks using live market data. Built with Pandas, NumPy, and Plotly to calculate and visualize annualized returns, volatility, dividend yields, and return correlations in an interactive dashboard.
➢ Personal Portfolio Website
Developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, and contact information.
